IronFX Blackberry Trader

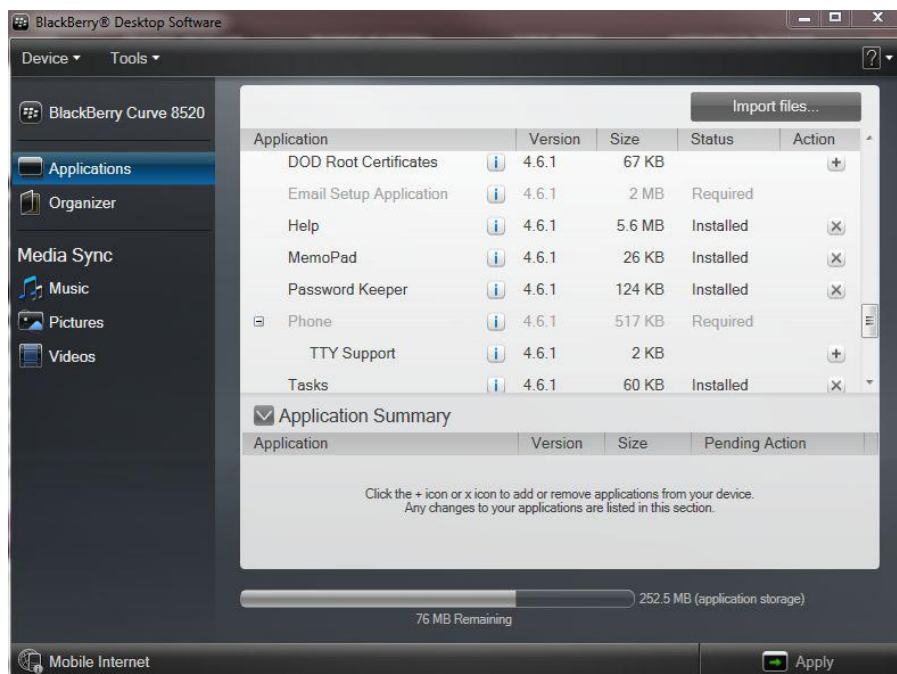

A. How to Find and Install using Desktop Manager

To download the Blackberry Trader you will need to add the application using BlackBerry Desktop Manager. Download IronFX_desktop_installer.zip file from www.IronFX.com and extract files.

Open the Desktop Manager and select '**Applications**'.

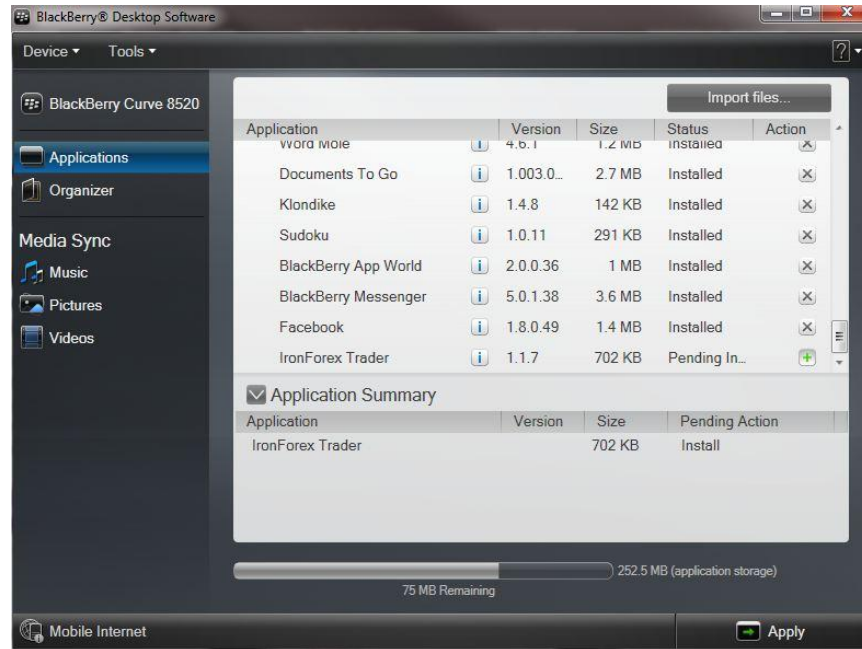

Click '**Import files**' and select IronFXTrader.alx from the related folder.

Click '**Open**'.

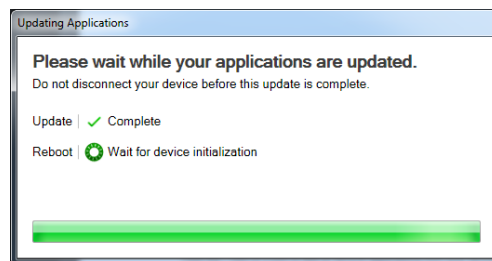

The application is now displayed in the Application Loader.

To install the application click '+'

Then click '**Apply**' in the bottom right corner.

The **Update complete** screen confirms the download was successful.

B. How to Find and Install using Blackberry Smartphone

Go to '**Browser**' in your Smartphone and type <https://ironforex.com/bb/IronForexTrader.jad> then click '**Enter**'.

On the next page click '**Download**'.

Click '**OK**' after the installation.

C. How to Login

Once installed, the application will appear in the **Downloads** folder. Open the **Downloads** folder and select the 'IronFX Trader' icon.

Important note: The application is designed for all the BlackBerry models running OS 5.0 and higher. Both touch screen and classic models.

The application will launch directly to the **Login** screen where you can enter your account details: enter your login number and password for your Trading Account.

Select your Trading Server and connection type.

Important note: To connect to trading servers and use your application with Cellular data network (GPRS) make sure that the APN ("Access Point Name") is specified on your Smartphone:

On the Smartphone go to **Options** → **Advanced Options** → **TCP/IP** and enable **APN settings**. Contact your mobile provider for farther information.

IronFX Trader doesn't work with 'BISB' connection type!

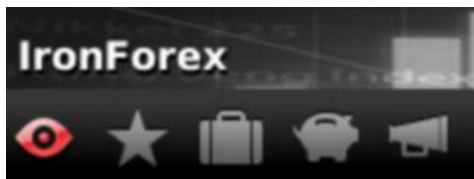

Once you have tapped the login button, it will attempt to connect to the server and log you into your Trading Account. Once the login process is complete the home screen **Majors Forex** will appear.

D. Navigation

Navigation of IronFX Trader menus is done from the top bar on each page where you enter the menus using the icons IronFX Trader.

a) Favorites

You can store your favorite instruments that you would like to access quickly and easily – the instruments can always be viewed in this area.

b) Rates

Shows you the list of all tradable instruments

c) Trades

This function shows your order details: open positions, balance, and pending orders.

d) History

Your trade history gives you the ability to monitor your closed orders, deposits and withdrawals within any given time frame.

e) News

The News function allows you to access the same news as MT4 trading terminal.

E. Trading Functions

a) Opening a New Order

Opening a trade is easy and can be done from the **Rates** screen of the platform. Select your chosen symbol to open the options menu.

You have four options:

- Instant Order
- Pending Order
- Chart
- Add to Favorites

Select 'Instant Order'

For instant orders and pending orders you can select and change the Volume, set a Stop Loss, and Take Profit for the order.

Set trade parameters:

- Volume
- Stop Loss
- Take Profit
- Return to Chart

Then click '**Buy**' or '**Sell**'

When your order has been processed a confirmation screen will appear.

b) Closing Open Positions

To close an open position you must first select the position you wish to close from the **Trades** menu where you will be given the option to modify or close your trade.

Select '**Close**'

Your request will be sent for processing. When your order has been processed a confirmation screen will appear.

c) Open a Pending Order

Opening a trade is easy and can be done from the **Rates** screen of the platform. Select your chosen symbol to open the options menu.

You have four options:

- Instant Order
- Pending Order
- Chart
- Add to Favorites

Select '**Pending Order**'

You will have options for Volume, Stop Loss, and Take Profit. With the pending order you can set the price that you want the pending order to be activated at.

Your request will be sent for processing. When your order has been processed a confirmation screen will appear.

d) Modifying Open Positions

To modify an open position you need to first select your open trade from the **Trades** menu. By opening the trade you have the option to modify the Stop Loss and Take Profit values. To confirm select '**Update**'

Your request will be sent. When your order has been processed a confirmation screen will appear.

e) Modifying Pending Orders

If you select a pending order from the **Trades** menu, you have the option to **Update** or **Delete**. You can also change or adjust the open Price, Stop Loss and Take Profit.

When your order has been processed a confirmation

Screen will appear.

f) History

Your trade history gives you a comprehensive overview of all your closed orders.

First enter the **History** menu and then use the search icon () to enter your date range.

Use the scrolling menu to enter the Start and Finish dates.

Click on '**Request**' to download the requested history.
